CANUE Metadata NDVI Modis V1.0
2017-10-23

DATA SET INFORMATION

Data Set Title:	Normalized Difference Vegetation Index (NDVI) MODIS Time Series
Description:	<p>Normalized difference vegetation index (NDVI) data from the Moderate Resolution Imaging Spectroradiometer (MODIS) onboard the TERRA satellites were accessed via Google Earth Engine (https://explorer.earthengine.google.com/#detail/MODIS%2F006%2FMOD13Q1). These NDVI data are provided as 16-Day composites at 250 m spatial resolution for all of Canada as far back as 2000. The MODIS NDVI product is computed from atmospherically corrected surface reflectances that have been masked for water, clouds, and aerosols .</p> <p>CANUE staff created annual and growing season composites from the 16-day day, and exported the results within the bounding coordinates -140 to -52 degrees longitude and 41 to 60 degrees latitude. These were then used to calculate annual and growing season (defined as May 1st through August 31st) metrics for all 6-digit DMTI Spatial single link postal code locations in Canada, and for surrounding areas within 500m and 1km.</p>
Theme Keywords:	Greenness, MODIS Terra, NDVI, satellite monitoring, normalized difference vegetation index, annual, growing season
Place Keywords:	Canada national
Data preparation date:	8/1/2017
File Names	GRMOD_AMN_YY.csv (annual mean NDVI); GRMOD_AMX_YY.csv (annual maximum NDVI); GRMOD_GM
File Type:	Comma separated values (.csv)
Beginning Date:	2000 (Feb 2, 2004)
End Date:	2015
Sampling Frequency of Data:	Annual
Number of Data Files:	16 files each for annual mean NDVI, annual maximum NDVI, annual growing season mean NDVI, and annual growing season maximum NDVI.
File Size	Individual year files range from 54 MB to 77 MB in size, all 16 files for each metric are between 1 and 1.2 GB in size, all files for all metrics total 4.2 GB in size.
Data Sources:	See Data Description and Supporting Documentation
Spatial Resolution:	250 metres
Detection Range or Limit:	-1 to +1
Log of Changes:	N/A
Maintenance Description:	Indices for subsequent years will be added when available.
GEOSPATIAL REFERENCE	
Geographic Coverage	Canada
West Bounding Coordinate	N/A
East Bounding Coordinate	N/A
North Bounding Coordinate	N/A
South Bounding Coordinate	N/A
Geometry Type:	N/A
Point Data Source:	N/A
Coordinates have Z values:	N/A
Geographic Coordinate System:	N/A
Datum	N/A
Unit:	N/A

CANUE Metadata NDVI Modis V1.0
2017-10-23

QUALITY ASSESSMENT	
QA/QC procedures:	CANUE did not assess the quality of the MODIS data. Users should review the documentation provided in the recommended citation, and in the supporting documentation listed below.
Geographic Coordinate Positional Accuracy:	These metrics can be linked to the corresponding annual postal codes files for mapping and analysis purposes, using the 6-digit postal code as a unique identifier in both files. Refer to the following metadata file for additional information on opportunities for assessing the spatial representativeness of postal code locations when these metrics are linked: CANUE Metadata Postal Codes V1.0.pdf
Vertical Positional Accuracy:	N/A
Attribute Accuracy:	N/A
Data Validity :	N/A
Associated Files:	N/A
Data Comment:	Maximum NDVI values of +1 may indicate residual cloud contamination or other image anomalies. Interannual anomalies in NDVI values may be reduced through the use of temporal averaging.

SUPPORTING DOCUMENTATION

DATA DICTIONARY		
Field Name (YY = last two digits of specific year of data)	Description	Data Type
GRMOD_AMN_YY.csv files		
GRMODYY_PC	6-digital postal code with no space between the FSA and LDU. (i.e. L1R2H2)	Text
GRMODYY_01	Annual mean value at postal code (range -1 to +1)	Numeric
GRMODYY_02	Annual mean of means 500m (range -1 to +1)	Numeric
GRMODYY_03	Annual mean of means 1000m (range -1 to +1)	Numeric
GRMODYY_04	Annual max of means 500m (range -1 to +1)	Numeric
GRMODYY_05	Annual max of means 1000m (range -1 to +1)	Numeric
GRMOD_AMX_YY.csv files		
GRMODYY_PC	6-digital postal code with no space between the FSA and LDU. (i.e. L1R2H2)	Text
GRMODYY_06	Annual max value at postal code (range -1 to +1)	Numeric
GRMODYY_07	Annual mean of max 500m (range -1 to +1)	Numeric
GRMODYY_08	Annual mean of max 1000m (range -1 to +1)	Numeric
GRMODYY_09	Annual max of max 500m (range -1 to +1)	Numeric
GRMODYY_10	Annual max of max 1000m (range -1 to +1)	Numeric
GRMOD_GMN_YY.csv		
GRMODYY_PC	6-digital postal code with no space between the FSA and LDU. (i.e. L1R2H2)	Text
