## DATA SET INFORMATION

Data Set Title: **National Nitrogen Dioxide (NO<sub>2</sub>) regression-based annual concentration estimate**

Description: The national NO<sub>2</sub> (ppb) land use regression model was developed from 2006 national air pollution surveillance (NAPS) monitoring data, following methods reported in Hystad et al. (2011) (see Required Citation below). Background and regional components were estimated in the LUR using satellite-derived NO<sub>2</sub> estimates and geographic variables, while local scale variation was modeled using deterministic gradients. The final LUR model includes: road length within 10 km; 2005-2011 satellite NO<sub>2</sub> estimates; area of industrial land use within 2 km; and summer rainfall. This model explained 73% of the variation in NAPS measurements with a root mean square error (RMSE) of 2.9 ppb. Local scale variation was modeled using deterministic gradient from the literature and kernel density measures and added to the final LUR model results to produce the final NO<sub>2</sub> estimates in this dataset. Dr. Perry Hystad (Oregon State University) produced the final estimates for all unique locations of DMTI Spatial Inc. single link postal codes active at any time between 1983 and 2015.

Annual measured NO<sub>2</sub> levels from National Air Pollution Surveillance monitoring stations for 24 Census Divisions have been used to produce the estimated levels for 1984 through 2012. based on the modelled values. (See NO<sub>2</sub> Supplementary Methods Documentation, in Supporting Documentation).

Theme Keywords: NO<sub>2</sub>, nitrogen dioxide, land use regression, air quality

Place Keywords: Canada, national

Data preparation date: 2018-1-24

File Names NO2LUR\_A\_YY.csv

File Type: Comma separated values (.csv)

Beginning Date: 1984

End Date: 2012

Sampling Frequency of Data: Circa 2006 with annual monitoring data

Number of Data Files: 29

File Size 75 MB

Data Sources: Between 22 B and 32 MB, total size of all files is 772 MB

Spatial Resolution: Individual 6-digit postal code locations

Detection Range or Limit: N/A

Log of Changes: Renamed variables, in order, to: NO2LURYY\_A\_01, NO2LURYY\_A\_02, NO2LURYY\_A\_03, NO2LURYY\_A\_04, NO2LURYY\_A\_05

Maintenance Description:

## GEOSPATIAL REFERENCE

Geographic Coverage: Canada

West Bounding Coordinate: N/A

East Bounding Coordinate: N/A

North Bounding Coordinate: N/A

South Bounding Coordinate: N/A

Geometry Type: N/A

Point Data Source: N/A

Coordinates have Z values: N/A

Geographic Coordinate System: N/A

Datum: N/A

Unit: N/A

### QUALITY ASSESSMENT

|  |   |
|--|---|
| QA/QC procedures:                          | CANUE did not assess the quality of the NO <sub>2</sub> estimates data. Users should review the documentation provided in the recommended citation, and in the supporting documentation listed below.   |
| Geographic Coordinate Positional Accuracy: | These metrics can be linked to the corresponding annual postal codes files for mapping and analysis purposes, using the 6-digit postal code as a unique identifier in both files. Refer to the following metadata file for additional information on opportunities for assessing the spatial representativeness of postal code locations when these metrics are linked: |
|  | <a href="#">CANUE Metadata Postal Codes.pdf</a>   |
| Vertical Positional Accuracy:              | N/A   |
| Attribute Accuracy:                        | N/A   |
| Data Validity:                             | NoData = -9999 for numeric fields   |
| Associated Files:                          | N/A   |
| Data Comment:                              | N/A   |
| Data Comment:                              | N/A   |

### SUPPORTING DOCUMENTATION

|                           |   |
|---------------------------|---|
| Additional documentation: | <a href="#">Hystad Canada NO2 LUR description.pdf</a>       |
|                           | <a href="#">NO2 Supplementary Methods Documentation.pdf</a> |

### DATA DICTIONARY

| Field Name:   | Description  | Data Type |
|---------------|--|-----------|
| POSTALCODE_YY | 6 digit postal code with no space between the FSA and LDU. (i.e. L1R2H2).  | Text      |
| NO2LURYY_A_01 | Original LUR annual average concentration at postal code (ppb), circa 2006   | Numeric   |
| NO2LURYY_A_02 | Annual average concentration at postal code (ppb) for file year  | Numeric   |
| NO2LURYY_A_03 | Census division identifier   | Text      |
| NO2LURYY_A_04 | Census division name   | Text      |
| NO2LURYY_A_05 | Maximum distance between postal code location and census division boundary in meters (0 = postal code is located within census division) | Numeric   |
